Non-flammable stone wool slabs made of basaltic and gabbroic rocks

Product Description

THERMOWOOL ROOF V EXTRA 170 is non-flammable, hydrophobized heat- and sound-insulating slabs made of mineral wool based on the basalt group rocks.

Scope of application:

THERMOWOOL ROOF V EXTRA 170 slabs are intended for use in civil and industrial construction as a heat-insulating layer in new construction and reconstruction of buildings and structures for different purposes.

It is used as a top layer in multi-layer roof insulation

Storage:

Slabs should be stored packed and stacked on pallets divided by types and sizes. During the entire storage period, the material must be protected from atmospheric precipitation. The height of the stack of slabs should not exceed 3 m upon storage.

Packaging Details:

Polyethylene shrink wrap is used for packaging. The method of wrapping and fixing a packaging material must ensure the reliable and strong packaging of slabs, their protection during loading and unloading operations, transportation and storage.
